

OPTOMECHANICAL ASSEMBLIES

Altechna

1.

Optical Components

With more than 27 years of experience, Altechna is a market-leading custom optics manufacturer.

- High-end custom-tailored optics.
- Market-leading optical performance and superior LIDT results.
- Manufactured in-house at Altechna.

2.

Mechanical Components

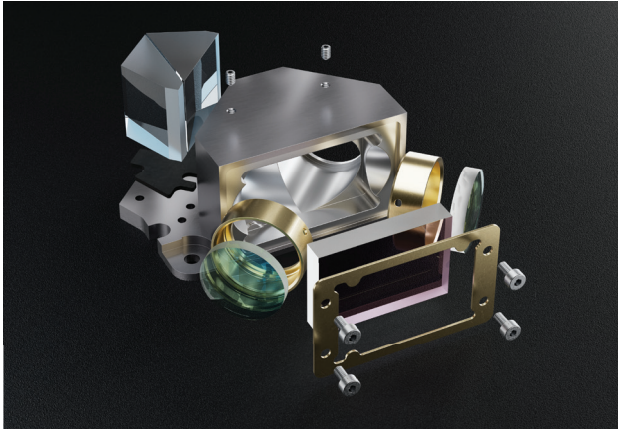

Altechna's trusted strategic partners provide necessary metal and plastic parts, as well as other components.

- Key materials and various surface finish types readily available.
- High-end machinery provides a wide range of CNC turning, CNC milling possibilities.
- Ensured quality and repeatability.

3.

Optomechanical Assemblies

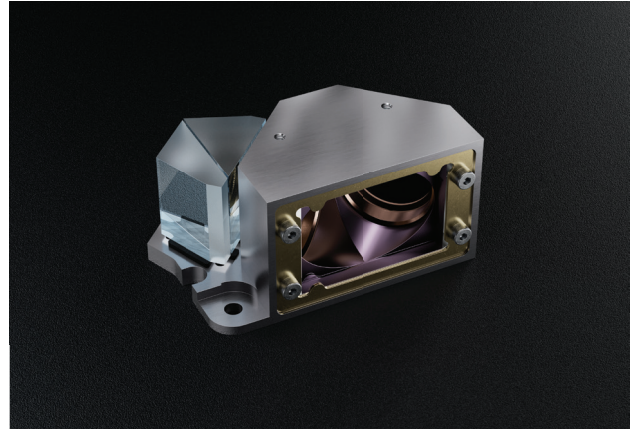

Bespoke optomechanical solutions designed and manufactured in-house to your specific needs.

- Dedicated engineering team ready to help with your design and specifications to reach excellent performance levels with the lowest cost possible.
- Altechna's experienced assemblers have mastered the techniques needed for highest-precision systems, incorporating low out-gassing, low-shrinkage adhesives, providing stable and stress-free mountings.
- Micron-level precision, arcsec angles and lowest tolerance stack-up is our daily work.

4.

One Source

Altechna is your single source for all photonics solutions, reducing your supplier count to one.

- After each manufacturing phase, all raw materials, sub-assemblies, sub-components and parts are reviewed by the established quality gates.
- The final optomechanical products leaving Altechna are of a superior quality, pre-aligned, tested and certified in ISO 6 work areas.
- This leads to a reduction of your product's time-to-market to the bare minimum, and it is done with market-leading speed and quality that is second to none.
